

Nitrogenous Fertilizers Market in Brazil 2015-2019

“Nitrogenous Fertilizers Market in Brazil 2015-2019” is the latest addition to MarketResearchReports.Biz industry research reports collection.

About Nitrogenous Fertilizers

Nitrogen is an essential requirement in plant proteins. While it is present abundantly in the Earth's

atmosphere, several plants are incapable of converting them into a form they can use. Hence nitrogenous fertilizers are used as a substitute and aid in enhancing plant growth rates, and color and texture of crops. The nitrogen in the fertilizers stimulates chloroplasts in plants and improves the rate of photosynthesis, ensuring consistency in crop quality and yields. They are available in two forms: dry pellets and liquid.

Technavio's analysts forecast the nitrogenous fertilizers market in Brazil to grow at a CAGR of 3.07% in terms of revenue and 4.44% in terms of volume over the period 2014-2019.
